

Traveling Resident Scholar Program

Applications Now Accepted

Since 1999, IVUmed has provided over 250 urology residents with the opportunity to gain unique surgical experience in resource-limited settings throughout the world. Residents in PGY-3 and above travel to IVU global partner sites with Board-certified mentors. As over 80 training programs can attest, this competitive program not only benefits the resident, but also the resident's home institution.

Program Highlights

- Open to urology residents PGY-3 and above
- Resident Scholars participate in a 10-14 day IVU surgical workshop with a Board-certified mentor urologist
- Focus on reconstructive, pediatric, female, or urologic oncology
- IVU teams serve patients in need in partner hospitals in Africa, Asia, and the Caribbean
- IVU workshops focus on training local doctors and nurses to build capacity and increase access to quality urological care
- 290 IVU Resident Scholars have participated since the program's inception in 1999

Applications Due March 1, 2024
